U.S. Drought Monitor

September 18, 2018
(Released Thursday, Sep. 20, 2018)

Valid 8 a.m. EDT

Author:
Jessica Blunden
NCEI/NOAA

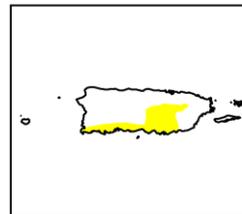

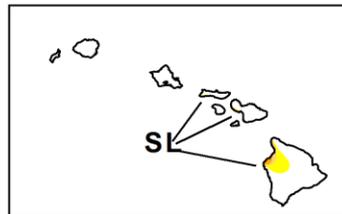

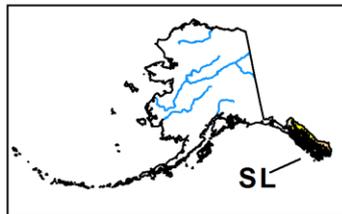

Drought Impact Types:

- ~ Delineates dominant impacts
- S = Short-Term, typically less than 6 months (e.g. agriculture, grasslands)
- L = Long-Term, typically greater than 6 months (e.g. hydrology, ecology)

Intensity:

- D0 Abnormally Dry
- D1 Moderate Drought
- D2 Severe Drought
- D3 Extreme Drought
- D4 Exceptional Drought

The Drought Monitor focuses on broad-scale conditions. Local conditions may vary. See accompanying text summary for forecast statements.

October Outlook

Ag Highlights

- 4.0 days suitable for work (through Sept. 16)
- Harvest was delayed in some areas with some ponding
- Corn for grain and soybean harvests began.

Returning User

Welcome to the **Field Application Resource Monitor (FARM)**. Water quality is important to all Ohioans and we all impact our watersheds. In recent years, Ohio farmers have taken significant positive steps toward limiting the negative impacts on water quality that come from the loss of sediment and nutrients. FARM allows users to define their locations of interest and receive 12- and 24-hour precipitation forecasts to aid in the application of fertilizer, manure, and/or pesticides. FARM also utilizes a database of historical forecasts allowing users to search previous dates. Users can choose to create accounts with multiple fields, explore statewide conditions in quick-view, and will soon be able to sign-up for text alerts coming in spring 2018.

This project is made possible through a Connect and Collaborate Grant, a program supporting innovative and scholarly engagement programs that leverage academic excellence of The Ohio State University in mutually beneficial ways with external partners.

Summary of Conditions

Back Cover Photo Credit: Kat Bledsoe - katscanx(Instagram)

Drought Monitor: Nothing of note

Climate Recap: Very warm week with heavy rain in the eastern counties; Warm and wet conditions have prevailed since the beginning of August

The week ahead: A couple of disturbances likely to bring widespread moderate rain (locally heavy)
